

Glaucoma: An Ophthalmic Minefield

Douglas Esson, BVSc, MRCVS, DVM, DACVO

Eye Care for Animals

Tustin, CA

The Small animal glaucomas represent a challenging arena for the primary care veterinarian. Accurate & prompt diagnosis is critical in order to successfully manage these complex ophthalmic diseases, which are typically rapid in onset and unforgiving in their behavior. This lecture will serve to outline the relevant anatomy & physiology, define the major categories of glaucoma and describe appropriate medical & surgical treatment options.
