

GUMMY DELIVERY TECHNOLOGIES

Gelatin & Plant-Based Gummy Technology for a Consumer Preferred Dosing Experience

As a leading innovator in nutritional supplements, Catalent also now offers advanced gummy development and supply capabilities that combine extensive nutraceutical gummy formulation and manufacturing expertise with a delicious dosing experience that consumers love. With both gelatin-based as well as 100% plant-based and vegan certifiable gummies available, along with Kosher and Halal certifications, Catalent has the ability to meet a wide range of consumer needs or preferences.

Technical Advantages

- Pre-formulated and custom formulation options available
- Customizable flavor profiles and taste-masking
- Multiple shapes, sizes, and colors
- Veggie gummies feature 100% plant-based pectin formulations for vegetarian or vegan products
- Produced in NSF certified facilities free of 8 major allergens
- Turnkey supply in bulk, bottles, or film pouches

Consumer Benefits

- Great taste and texture profiles for enhanced consumer experiences
- Suitable for a wide range of ingredients across most supplement categories
- Available in gelatin or plant-based formats to meet consumer needs or preferences
- Certified non-GMO, Organic, Vegan, Kosher and Halal options available
